Dear Mr. Hutto,

I'm writing to inquire about the opening for an internship at Modesto Oral Surgery. I believe that my experiences and skills gained throughout my schooling thus far make me an ideal candidate for this position, and I am eager to possibly join you and your team in the future.

My current schooling only consists of 8th grade graduation, as I am a current sophomore in high school. I hope to achieve a B.S. in biology, get past and learn from dental schooling, have a residency opportunity, and become an orthodontist in the future. I believe that I am fit for this position because of my outstanding dependability, work ethic, reliability, and communication skills that I have been developing and refining throughout my high school career. My experience in leadership/ASB at Ripon High School has really taught me how to improvise, adapt, and overcome any challenges that come my way, and this will translate well into my work. I am very passionate about my work, I work great with others, and I believe that overall I would be great in your company.

My resume contains additional details and information about my professional skills and abilities. I am looking forward to my opportunity to speak with you during the interview to discuss my qualifications for this position. Thank you for your time and consideration.

Sincerely,

Spencer Redula
